

A person is sitting on a rocky cliff edge, looking out over a vast, hazy landscape. The scene is captured in a high-angle, wide shot, emphasizing the scale of the environment. The person is wearing dark clothing and is positioned on the right side of the frame. The background shows rolling hills and a distant horizon under a bright sky. The overall mood is serene and contemplative.

OUTDOOR

### USE

Created for those with great needs comfort – support in the plantar area and in the heel. Ideal for hiking and long walks.

### FEATURES

The structure of the foot is composed of a mesh texture with cushioning created to dampen the resulting vibrations from the ground while walking also on steep terrain.

At the same time the texture, created with micro 3D channels and the abundant use of wool merino from new zealand makes it much easier air circulation, maintaining the foot dry and at a pleasant temperature, also ensuring an ergonomic fit. The ankle area features a lining additional to ensure greater stability.

Reflective yarn used at the end of the leg to increase visibility when walking in places frequented by cars or bicycles.

- Full cushioning
- Ventilation
- Breathable
- Ankle stabilization

## USE

Created for those who need performance at the top in trail running or mountain running, combines comfort and compression structure, ideal for stability and circulation.

## FEATURES

The structure of the foot is composed of a differentiated coolmax mesh weaving by pressure area e right sock/left sock. The base guarantees the right cushioning/breathability thanks to the properties of Coolmax. From the ankle they change structure and yarn. It is used the antibacterial Q-Skin with a gradual compression to help circulation and give more stability to the ankle, useful on the most demanding sections of trails.

### USE

Created for those who need performance at the top in running, mainly up road or simple paths. Combines great lightness, breathability and cushioning in a single product.

### FEATURES

Designed specifically for running, these socks feature cushioning more marked on the heel, in the sole of the foot and in the toe area for greater comfort. To ensure an excellent fit, the right foot and the left one were designed individually, so as to better accommodate the movement and position of the running foot. The ultra-lightweight material offers a comfortable feel of bare feet, while ensuring correct structure required for running.

The construction of the sock allows a constant circulation of air around the foot, keeping the skin cool and dry even at high temperatures. From a green perspective, the bottom yarn is produced with recycled material.

# CALZINI PADEL PRO *stability*

## USE

Created for those who need maximum performance, great stability and ankle protection/support. Always with the unmistakable style of MBwear.

## FEATURES

The foot structure is composed of a differentiated mesh weave per pressure area with support in the specific areas of greatest load. The base provides the necessary cushioning/breathability for use with tennis and padel shoes. In the ankle area, a workmanship has been used that helps the ankle to be more stable.

From the malleolus there is gradual compression that facilitates blood circulation and helps with prolonged exertion.

To increase stability and adherence, silicone applications have been inserted in the support/thrust area and in the area of the achilles tendon attachment.

The yarn used is specifically for technical/sports use, with silver ions that make it antibacterial.

# SOCKS SKI DISTANCE

## USE

Created for those who want a fashionable touch even in the snow but without giving up to the high quality of the product and the lightness and breathability given by the Q-Skin

## FEATURES

Ideal for all users who want a product that guarantees great performance, incredible durability and design unique ones that give a fashion touch to sporting activity. Equipped with a net with breathable channels throughout construction, guarantees the push towards the outside of the humidity and thanks to the ions of silver avoids bad odors and makes it antibacterial.

Thanks to the texture used and the grade of tension of the fibres, it also helps circulation, thus guaranteeing excellent sensitivity and a ventilated and dry foot.

## MAIN MATERIAL

Q-SKIN is a polyamide 6.6 fibre with silver ions directly inserted during the spinning process to regulate bacterial growth with lasting effectiveness. The Q-SKIN® fibre cares for the skin and offers the wearer breathability, freshness, hygiene and comfort. During normal daily activity or in sport, our body produces sweat; Q-SKIN® technology is activated when sweat molecules come into contact with the fibre: the silver ions contained inside help reduce excess bacterial flora, the main cause of bad odours. The Q-SKIN® fibre keeps its characteristics intact over time, even after numerous washings. Bacteriostatic effectiveness tested by the MIS PLUS institute in Zurich according to DIN ISO 20743: 10-2007 and washing resistance tested by the MIS PLUS institute in Zurich according to JIS L 1902/02. Q-SKIN® has obtained numerous certifications for the protection of personal health and the environment. The OEKO-TEX STD 100 CLASS I label proves that the fibre is harmless to human health

ONE SIZE (31-36)

SOCKS  
SKI  
FUN KIDS

## USE

This top was created for any type of sports use, be it cycling, running or gym. It guarantees high breast support, allowing any motor activity in maximum freedom and comfort

## FEATURES

Structured with different fibers and a differentiated texture according to the needs of body mass containment / correct temperature maintenance / expulsion of water vapor deriving from sweating.

Specifically, Breeze and Dryarn have been used to ensure the perfect balance between expulsion of humidity and maintenance of correct body temperature.

The structure was conceived to allow the woman maximum freedom of movement while at the same time supporting her in critical points.

The seamless technology contributes to avoiding unnecessary pressures that are often created in garments made with the traditional method (with seams).

The mixture of fibers used and differentiated weaving means that this top is second to none for sports use

## MAIN MATERIAL

1. there is no fiber that exceeds the Dryarn in conveying moisture from the inside to the outside;
2. Dryarn is the best hydrophobic fiber. Absorbs all the humidity released by your skin and carries it outside;
3. It has exceptional strength and a specific gravity lower than other fibers. So unbeatable durability and lightness;
4. extreme resistance to bacteria, fungi, microorganisms and insects. So more hygienic clothes;
5. very fast drying speed and can be washed by hand, in the washing machine and dry;
6. respects nature as no dyeing operations take place to color it and it is also 100% recyclable;

## USE

This shirt has been created for any type of sports use, be it cycling, running or skiing.

For outdoor activities, use in winter is recommended.

## FEATURES

Structured in such a way as to ensure maximum expulsion of wet cells to the outside, thanks to the total use of Dryarn and a different texture in the areas of greatest ventilation.

Turtleneck not too high to leave freedom of movement in the neck and possibility to wear it more freely. Specific "stretched" cuff to ensure greater elasticity and adherence, limiting the infiltration of air from the outside.

The garment is therefore able to have excellent thermal insulation, guaranteeing the user a dry skin for as long as possible and eliminating unnecessary pressure in the dermis thanks to the seamless construction, typical of all MBwear products.

Hips worked in such a way as to guarantee further elasticity to the garment and ensure that it has an excellent fit for all types of body.

Design, as always, unique and elegant.

## MAIN MATERIAL

## OPPONENTS, TEAMMATES, FRIENDS AND ASSOCIATES

This was the path of Tiziano and Marco. United by the same dream: create products of the highest quality and unique, unmistakable Italian design. For this reason, in 2015, when they were still professional cyclists, after creating a sock for personal use, they founded MBwear. The company reflects the DNA of the two partners and is focused on the following key points:

- research and development of fabrics and yarns;
- attention to detail;
- creation of unique designs thanks to designers from different sectors;
- strong link with the territory and totally Made in Italy production.

Adventure started with 1 model of socks in only 4 colors, then it developed and expanded over time inserting specific models for different uses but always following the performance guidelines, comfort and design.

In 2017, taking advantage of their personal experience as former professional cyclists and other actually in activity, they began developing bib short, jerseys and base layer, included in the collection since 2019. The success of these new items, projects the company into a new dimension and allows finally to brand a cyclist and offer to customers a unique total look. The company's policy remains the "step-by-step" growth, inserting new articles only later accurate tests in order to guarantee the highest quality possible for its customers. This is possible thanks to the insertion over time of figures with 40 years of experience in the textile and sports technician sector, constantly looking for professionalism that can provide their contribution in the creation of unique and innovative products,
