JERSEY LUXURY

ROAD

MAN

FEATURES

A jersey that represents the MB WEAR brand to the fullest, with cutting-edge finishes and a fit that is refined to the smallest detail.

This garment is almost entirely RENE W FINE dyed to increase its technicality while also guaranteeing unique softness. The IS400010Z laser-printed fabric is found in the sleeves to guarantee a perfect fit and vibrant colour.

The fabric at the bottom of the jersey is in EASY TAPE (hot-stitched), making the finish similar to the latest generation raw cut.

To make the garment even more special, a collar with refined stitching has been made that makes it look like a raw cut.

The three back pockets are made of durable Air Stream mesh to ensure maximum breathability. Each garment is also recognisable by the MB branded patch and the thermo-sticker on the back with the central MBwear signature.

USE

This jersey was created primarily for the mid-warm seasons, combined with a windproof waistcoat in case of need.

JERSEY RAPIDO

ROAD

MAN

FEATURES

A jersey totally printed in Levante performance fabric that leaves the main aesthetic part to the design, thanks to the eye-catching graphics. The Marettimo fabric is found in the sleeves with a rounded cut and turned-up finish so as to best bandage the shoulder/biceps area, keeping the sleeve stable but without compressing it.

The front bottom of the garment is turned inside out for a continuous aesthetic effect. Each garment is recognisable by the MB branded patch and the back heat-sticker in the centre pocket with the MBwear signature reflex strip.

The pockets are made of Air Stream to facilitate the expulsion of wet particles.

USE

This jersey was created primarily for the summer season and for those who want a jersey with a race feel and ultra-breathable fabric.

HAKUNA MATATA

LONG SLEEVE JERSEY SPRING 3.0

ROAD

MAN

FEATURES

Spring long-sleeved jersey, made for the most part in NATIVE INSTICT fabric, suitable for mid-season days when the heat is not at its worst.

Careful attention has been paid to every detail to ensure a 'second-skin' fit that also helps wick away sweat in a very short time.

The MARIBOR REFLEX in the sleeve helps to be more visible and increase safety on the road.

The cuff finishes are formed by the PERFECT STYLE in a raw cut so that the wrist is wrapped without pressure points.

Three back pockets.

The zip is branded by MB with the elegant zip pull. Each garment is also recognisable by the MB branded patch and the back heat sticker.

USE

Knit designed for use during days with average temperatures in early autumn and early spring.

GILET BOMBER 2.0

UNISEX

FEATURES

The Bomber waistcoat is an elegant and technical garment combining road biking and the appeal of the new gravel. The evolution since the 2024 season has brought the insertion of blizzard fabric side panels that make the garment much more elastic and comfortable; three back pockets for longer rides. In addition, the garment has two reflex stripes, one on the front and one on the back, with the elegant MBwear signature on the inside.

The YKK zip is branded by MB with the elegant zip pull. Each garment is recognisable by the MB branded patch and the back heat sticker.

The technical fabric chosen is generally used for outdoor mountain products as it is extremely light and high-performance.

For the same amount of heat generated, it is much lighter than a fleece fabric, resulting in

- warm
- light
- comfortable.

It also has windproof properties and DWR anti-water treatment; the fabric also aids breathability while maintaining maximum comfort.

USE

This versatile waistcoat is suitable for everyday, urban, gravel but also for more classic road use due to its lightness and comfort.

BIB SHORTS SPECIALIS

ROAD

MAN

FEATURES

Men's/women's shorts (depending on pad shape) with shaped bib straps, rear mesh and insertion of rigid 'T' fabric that guarantees stability once the garment is worn.

The cutting-edge 'COBRA' fabric is compressive but soft to the touch, laser-cut and internally siliconised to prevent shifting during activity. The braces made of T2IN42 fabric have a cut and structure that minimises chafing in the upper torso, they are light but at the same time maintain adherence in the body thanks to the triangle structure between the shoulder blades, they are joined to the shorts with a new processing used to flatten the different tensions between materials.

Even the eye wants its part, the elegant MB WEAR name in the sides and the back patch make the garment recognizable. The MB pad allows you to go out from 6/8h

USE

This short has been created looking for the highest possible quality for an endurance short, suitable for both novices and performance purists.

MB PAD

The Cytech/MBwear pad uses sewn-in technology and offers an anatomical profile with great protection across the pelvic area.

High density foams are applied under the top layer to offer maximum performance on long distance rides. This pad guarantees adequate protection for the male anatomy while riding, providing the perfect stability. The central channel also improves blood flow and reduces pressure and numbness. The fabric selected is EIT ECO X-Mix, which features a mixed composition of polyamide and polyester. The mixed yarn composition guarantees cooling and quick-drying functions.

BIB SHORTS AIRONE

ROAD

MAN

FEATURES

Ultra-lightweight trousers suitable for higher temperatures. The REVOLUTIONAL ENERGY fabric allows perspiration and maintains body temperature. Compressive elastic at the bottom of the leg keeps the trousers in the ideal position with braces in Spider Black fabric.

Even the eye wants its part, the elegant MB WEAR name on the sides and the back patch make the garment unique. The long-distance Cytech/MBwear 3D pad wicks sweat away and keeps the ischial area dry at all times, guaranteeing the right comfort and protection when riding.

USE

This short has been created to ensure maximum breathability and lightness for summer use.

GRAVEL

JERSEY GRAVEL ADVENTURES

GRAVEL

MAN

FEATURES

The Gravel Adventures jersey is the concept of the future that unites the first-time cyclist with the more competitive athlete who wants to dress more comfortably.

The 19652 fabric characterises almost the entire jersey and was chosen because its cotton feel, elasticity and high breathability are its strong points.

A highlight is the rear reflective stripe with elegant MBwear signature on the inside.

The Time Out fabric of the large back pockets ensures resistance even under 'heavy loads', avoiding the classic 'back pocket drop'.

There is also the flap closure, which makes it easier to use the pockets and at the same time gives a touch of style.

USE

This jersey was created primarily for gravel and e-bike users in the late spring-summer-early autumn period. It features a model suitable for everyone and daily use, with a semi-regular fit and unique details that determine the MBwear style.
